

April Lunch and Learn Health Topic of the Month

Colon Cancer

Colon cancer is a disease in which cancer cells form in the colon. It is the second leading cause of cancer related deaths of men and women in our society. The sad, but encouraging truth is that **NO ONE HAS TO DIE**. This disease is almost 100% curable when detected and treated early. Signs and symptoms, diagnostic tests, factors that affect prognosis (chance of recovery) and treatment options will be discussed at this lunch and learn.

Speaker: Theresa Chandler, MSN, APRN-BC,
Director of the Mabry Center for Cancer Care
and Special Guest, Lisa Cecchini, RN,
colon cancer survivor

Friday, April 17, 2009
